Note: These figures are taken from the Cooperative Institutional Research Program Freshman Survey, which is conducted annually by the Higher Education Research Institute (HERI) at the University of California, Los Angeles. The survey covers a wide range of student characteristics including demographic and background information, high school activities, college plans, values, attitudes, and beliefs. Each fall, the HERI surveys approximately 300,000 full-time students entering the freshman classes from a nationally representative sample of 2-year and 4-year colleges and universities in the United States. From 1966 to 1970, approximately 15% of the Nation's institutions of higher education were selected by sampling procedures to participate in the program. Beginning in 1971, a stratified sample was selected from all institutions that have entering freshman classes and that respond to the U.S. Department of Education's Higher Education General Information Survey. An institution is considered eligible if it was operating at the time of the survey and if it had a freshman class of at least 25 students. The data presented above are weighted estimates of all first-time, full-time students entering higher education institutions in the fall of each year. Published reports on trends over 30 years or reports on individual annual survey results can be obtained by writing to the Higher Education Research Institute, 3005 Moore Hall, UCLA, Los Angeles, CA 90095-1521. Response categories were "agree strongly," "agree somewhat," "disagree somewhat," and "disagree strongly." The text or format of the questions or responses may differ slightly in different years.
